50X1-HUM

1. A plastics factory was opened at Makarska in March 1956. Eight of the former camp buildings are being utilized for the factory. One new building for the use of the management has been erected, and a foundry is under construction.
2. Since not all of the buildings are fully equipped, current production is limited to plastic products, e.g. material for fishing nets, and to repair work for other factories and individuals.
3. The factory now employs about 100 workmen, but will employ 400-500 when completed. The Yugoslav Armed Forces, especially the Navy, will provide some additional used machinery which will be repaired and installed. In return the factory will furnish material for the naval shipyards.
